

3 Profitable Digital Markets that Could Make You More than \$4000 Monthly

Digital market/marketing isn't a new development that you could say you haven't heard about. In fact it is now a new norm, extremely productive and profitable market that most people and businesses are benefiting from in this 21st century.

When talking about digital marketing, then you should know that it simply means utilizing the internet and smart technologies such as your mobile phone, laptop and other digital media, platforms and forums to promote and sell your skills, product and services.

Digital marketing is almost taking everything when you look at the world today. The richest people in the world today made it this far through digital marketing including people like Jeff Bezos, Mark Zuckerberg, Bill Gate and the likes.

Without too much of intros let's look at some of the digital markets you yourself can capitalize on and make some cash for yourself.

3 Profitable Digital Markets that Could Make You More than \$4000 Monthly

1. Freelancing:

Freelancing has taking over everything in the digital market. With almost every digital product/services/information being done, carried out or rendered by a freelancer(s).

If you have writing skills, transcribing, translating, web development, mobile app development, graphic designing and other digital skills you can actually make lot of money online if you utilize this skills.

An average freelancer earn 0 to 50,000 dollars yearly. That is, an average freelancer that isn't serious or lacking exposure can earn 0 dollars yearly, while

another average freelancer that is serious and well informed would earn up to or more than 50,000 dollars yearly.

Freelance experts from America and some parts of Europe earn up to or more than 1million dollars annually working for and providing digital services to people.

Where can I utilize my digital skills?

There are so many websites and platforms that will help you utilize your digital skills. This websites are well known across the worldwide web.

Clients from around the world come to this websites/platform to look for freelancers with outstanding talents. Such platforms include;

- **Upwork**
- **Freelancer**
- **Fiverr** *
- **LinkedIn**

2. Blogging:

Blogging is one sure digital market you can vest into and make some money for your self.

Personally I will say blogging is the heart or central of excellency in digital marketing.

In the sense that, through blogging you can make money from any kind of digital market if you're creative. Mention any digital market and I'll tell you how to make money from there through blogging.

You can make money as a blogger by simply monetizing your contents, that is visitors would have to pay to view your contents (digital information).

In order to make money from this kind of blogging, you would have to create quality "How to" contents (written or video contents) that people really need or an online course for people to learn. Successful bloggers from this niche make nothing less than \$1million annually.

You can also make money as a blogger by displaying Ads on your blog/website.

Bloggers with massive daily website visitors monetize their sites by displaying different kind of Ads through the help of Google Ads, Word Ads etcetera.

This bloggers make up to or more than \$1000 dollars every month, while some bloggers don't make anything probably because they run a free blog (just like mine). **Support my work.**

You can create and start up your own blog/website using the following web host/creators:

- **WordPress.com**
- **Blogger.com**
- **Godaddy.com**

3. Crypto investment:

According to many crypto enthusiasts, 2020 is going to be the best year to invest in cryptocurrencies with so many coins already making people rich over night.

2020 is not over yet you can still make a lot of money in the future by investing with as little as NGN500/USD1.4 now into any of the following coins;

- **Bitcoin (BTC)**
- **Etherium (ETH)**
- **Trons (TRX)**

- **Basic attention token (BAT)**

According to many crypto enthusiasts the prices of these coins are going to rise tremendously in the nearest future especially Trons and BAT.

The price of **Bitcoin and Ethereum** are already high so in order to invest in either of them you would have to spend high, while **Trons** and **BAT** are still at their peak and so you can still invest with very little amount.

TRON (TRX)

1 Tron (TRX) is currently equivalent to 12 Naira (1 TRX = \$0.026), that is you can buy up to 38 Trons with just NGN500 (\$1.2). Just imagine how much you would have when 1 Tron rises to NGN1000 (\$2.4) that's whooping NGN38,000/USD100 (do the maths your self). According to the prediction of crypto experts that's how high the price of Trons could rise in some couple of months.

Basic Attention Token (BAT)

1 BAT is currently equivalent to NGN64, that is you can buy up to 8 BATS with just N500. According to the prediction of many crypto enthusiasts, the price of BAT would rise tremendously in the future up to the price of Bitcoin and Ethereum due to the technology behind it (Brave).

The interesting thing about **BAT** is that you can actually earn it for free by simply using Brave web browser, the browser gives you certain amount of **BAT** when you use it to surf the web and allows you to exchange it to other crypto or withdraw to your bank account. Check out this article on "[**how to earn BAT just by browsing as usual.**](#)"

Best wallet to keep, buy and sell this crypto as a beginner in Nigeria or other countries include;

- **Roqqu**: with Roqqu you can buy/sell/withdraw up to 7 different cryptocurrency including BTC, ETH and TRX with as little as NGN300/USD0.9 (Roqqu recommended for beginners or small investors).

- **Binance**: with Binance you can buy and exchange over 500 cryptocurrencies. Although Binance beat many other wallet when it comes to saving, exchanging,

buying and selling with ease, but if you don't have at least NGN5000/USD13.2 you can't buy coins. (Best for intermediate and big investors).
